Life Is On | Schneider Electric

Home automation designed for growth

Simple yet innovative, the **Schneider Electric KNX Home Automation System** helps you meet unique customer demands and exceed expectations. It's a comprehensive smart home system that delivers comfort, efficiency, and peace of mind – as well as new ways to grow your business.

Combining proven technology with ease of use, the Schneider Electric KNX Home Automation System is a perfect fit for new build or renovation projects. It provides you with smart home solutions that are:

> Simpler than ever

> More connected

> Truly innovative

Home automation solutions made easy

With eConfigure KNX software, everything from design and commissioning to quotation and configuration can be done hassle-free. The software lets you control all aspects of a home automation installation, allowing you to win more projects and grow your business without risk.

- **Faster quotation** thanks to an intuitive catalog ensuring easy selection.
- **Easier configuration and commission** with the dedicated software that enables automated selection and device linking.
- **Time savings for repetitive projects:** Do more business – and more quickly – by importing similar configurations across projects.

Simple to design, install, and configure

eConfigure KNX software

The eConfigure KNX software from Schneider Electric is an efficient tool for equipping homes with smart functionalities. A plug-in for ETS expands functionality and simplifies work by making design and configuration of the system seamless and hassle-free. With an intuitive UI, all of the system components (pushbuttons, sensors, etc.) can be laid out in a fast and simple way.

Floor plan design: eConfigure KNX works the way you work, on a floor plan.

Time saving: Advanced software recommends the best devices and actuators for each situation. You can also use pre-made settings or re-use past ones for future projects. Build complete solutions with intuitive drag-and-drop functionality.

Simple to design, install, and configure (cont'd)

eConfigure KNX software

Easy commissioning: Identify configured devices quickly and easily. The software also includes an updated library of devices. A list of KNX products in switchboards is generated automatically, which makes designing electrical cabinets a breeze.

User-friendly interface: Thanks to an intuitive UI, everything is easy to understand for your customers. Additionally, you can showcase your work and offer in an attractive way.

Bill of materials and reports: An installation report and list of products (bill of materials) can be edited to allow you to build a complete and professional file.

A fully connected and tailored solution

The system is built for both local connectivity and secured remote access, thanks to the Schneider Electric Wiser for KNX automation controller. You can now configure and update the system remotely and offer better post-sales support and services to your clients.

- **A connected solution:** Remotely accessible, built on an open standard, cybersecure, and scalable.
- **Easy maintenance:** To save you time and money as well as satisfy your customers.
- **A customizable app / mobile user interface:** Tailorable to your customers' preferences.
- **Flexible:** Deliver a solution that fits your customers' budgets, needs, interests.
- **IoT integration:** The system is compatible with popular smart-home products (Sonos, Amazon Alexa, Philips Hue).

One device to connect them all

Wiser for KNX

Wiser for KNX is a powerful logic controller that works with different standards and protocols.

As a gateway: Wiser for KNX allows communication and interoperation of different residential control products and functions like lighting, blinds, heating, IP cameras, energy metering, and many more.

As a user interface: Wiser for KNX controls all the functions through a web server application. All the necessary information and functions can be displayed and controlled on local and mobile devices such as tablets, PCs, or smartphones.

As an event controller: Wiser for KNX can send a notification in case of any failure or issue.

One device to connect them all (cont'd)

Wiser for KNX

Wiser for KNX measures gas, water, and electricity consumption and monitors it on a daily, monthly, and yearly basis. It stores and analyzes data, making it possible to pinpoint potential energy-saving scenarios and increase energy efficiency.

Installation of Wiser for KNX is easy and efficient. Thanks to its compact, ergonomic size it is mounted on a DIN rail. No screws are required for wiring, and pre-programming is possible, which saves labor time on site.

Innovative technology meets modern design

The Schneider Electric KNX Home Automation System is built on a proven platform and is regularly updated with innovative products and features, making it highly efficient and user friendly.

By intelligently linking together distributed system components via bus, it offers a vast array of possibilities and a significant potential in the areas of energy efficiency, safety, security, and comfort.

The Schneider Electric KNX Home Automation System is:

- Robust, ergonomic, and flexible
- Available in multiple design options
- Easy and simple to use

Innovative, intuitive interfaces

With high-quality design and intuitive operability, the new **KNX Multitouch Pro** and **KNX Pushbutton Pro** focus on the essentials. Thanks to flexible functionality and flat construction design, they fit perfectly to a sophisticated ambiance.

By combining several functions in a single device they help reduce clutter on the walls and create sleek interior look and feel.

Innovative, intuitive interfaces

KNX Multitouch Pro

The KNX Multitouch Pro gives your customers a wealth of practical functions:

- Thermostat with analog input for floor sensors
- Lighting, temperature, shutter, and scene control via a touch-sensitive display
- Rotary display mode: one function per window – up to eight main functions
- Vertical display mode: two functions per window – up to 16 main functions
- Scene control: up to four settings per window – up to 32 settings
- System access protection with four-digit code
- Display illuminates when a user approaches
- Simple gesture controls
- Customizable screensaver

KNX Multitouch Pro
System Design, D-Life Metal, nickel metallic

Innovative, intuitive interfaces

KNX Pushbutton Pro

The KNX Pushbutton Pro offers homeowners numerous practical features:

- Lighting, blinds and scene control via one sensor cover
- Intuitive and simple operation
- Backlit: two shades of white or white and green
- Flexible allocation of sensor zones
- Night mode: time-controlled or activated as scenario
- Express commissioning for rapid programming
- Display illuminates when a user approaches
- Group addresses are retained even when the position of each function is changed

KNX Pushbutton Pro
System M, M-Pure, anthracite

Grow your business with Schneider Electric
